

IntelliXcap M8

IntelliXcap™ M8 Semi-Automated Handheld Screw Cap Decapper provides users with a flexible solution for capping and decapping 96-format screw caps for low-to-mid throughput environments with easily interchangeable cartridges to switch between tube types.

The innovative, interchangeable cartridge system is an easy-to-use solution for users with multiple tube types from various manufacturers. Simply switch between cartridges by aligning the cap drivers with the cartridge, then snapping into place. The system is compatible with Azenta internal and external screw capped tubes, and we are continuously developing new cartridges, including one for Azenta Acoustic tubes.

Key Features

DESIGNED WITH THE USER IN MIND

- Lightweight, handheld, semi-automatic single column-based capper and decapper
- Compatible with 96-format SBS rack screw capped tubes
- Caps a single column in under 4 seconds; caps/decaps a complete rack of 96 tubes in less than 90 seconds
- All caps are tightened to the same torque to create a secure seal
- Battery operation allows capping/decapping for more than 40 complete racks per charge
- Docking station for instrument placement/storage and charging also provides contamination-free handling of caps

- Single “action” button operation to decap, recap, and eject caps
- Option to eject caps onto cap carrier using second dedicated eject button

FLEXIBILITY FOR EASE OF USE

- Designed to be used by both left- and right-handed users
- Unit can be operated by battery charge or powered through AC plugin
- Easily transportable
- Interchangeable cartridges, easy to switch between cap types

*Suitable with a wide range of cartridges, contact your representative to learn more.
